Use CSI IDT-2800 and IDT-3000 In minimize setup and prep time while

IDT-2800

Both the IDT-2800 and IDT-3000 are completely self-contained units with a 2000 cc diesel engine, hydraulics, stabilizer, dual heavy-duty tires, air conditioning, and a full operator's package. The IDT series also features a radio transmitter incorporated into the control system so the loader can be operated from the unit easily and effectively. The IDT series is also available with a choice of either the PTD-264 pull-through

The IDT-2800 offers delimiting operations in a portable compact unit without a drain on the loader's hydraulic system. This frees the loader operator to do other tasks as necessary. The IDT series provides flexibility on the job site.

IDT-2800

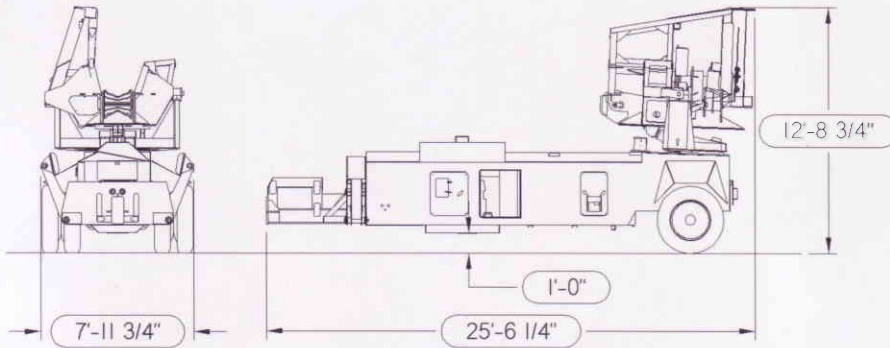

The CSI IDT-2800 -**LOADER INDEPENDENCE**
and IDT-3000 -**EASE OF SETUP AND USE**
offers the logger: -**MAXIMUM PRODUCTIVITY**
